

## Cyber and Data Resilience

Simplifying the complexity of mitigating cyber and data risks with elite experts, sustainable processes, and frontline risk intelligence

# Simplifying the Complexity of Cyber and Data Resilience

## The Challenge of Navigating Persistent, Complex Conditions

As organizations navigate recurring and fluctuating risks to their cybersecurity posture and critical data, such as persistent cyberattacks, evolving compliance requirements, complex supply chains and emerging technology vulnerabilities, there needs to be sustainable processes in place to continuously anticipate, withstand, and recover from these adverse conditions.

## Kroll is your go-to partner for simplifying the complexity of cyber and data resilience

We provide reactive, advisory, transformation and managed security services to support clients at every stage of their resilience maturity.

Our services leverage frontline risk intelligence from thousands of incident response, regulatory response, financial crime and M&A due diligence engagements per year to anticipate the most likely risks to your business and reduce your unique threat profile.

We combine this with over 650+ experts with background experience in law enforcement, industry and regulatory agencies to help you establish efficient, sustainable solutions to complex and persistent cyber and data resilience issues.

## Kroll Cyber and Data Resilience Services

### 3 Core Tenets of our Delivery Driven by Unrivaled Risk Intelligence

### Common Challenges We Solve

**Common Use Cases**

Lacking actionable intelligence to inform security strategy and prioritization

Need to redesign, improve or implement new controls and programs to optimize cyber risk posture

Expanding attack surface brings new vulnerabilities and compliance challenges

Need support to prepare for, detect, respond to and recover from cyber incidents

**How We Can Help**

Whether understanding your threat profile, complying with a regulation, or understanding the risk of a merger, we can help you anticipate the most likely security challenges and threats to your business using our intelligence from thousands of incident response, regulatory response and M&A due diligence engagements a year

We can design and implement scalable controls and evergreen programs to meet your unique resilience goals, rather than overinvesting in duplicate solutions, from Identity and Access Management and Cloud and Infrastructure Security to Threat and Vulnerability Management and OT Security

Our combined expertise, from our dedicated threat intelligence, compliance and data privacy teams to our offensive security and AI risk management teams, enables us to be agile to alert you of new and emerging risks and help you to immediately implement remediation activities

As one of the largest Incident Response providers with integrated expertise across Threat Detection, DFIR, eDiscovery, Litigation, Crisis Management and Regulatory Compliance, Kroll is uniquely equipped to boost preparedness and minimize the wider impact throughout the entire incident lifecycle

## Client Stories

### Canadian Bank - Building scalable penetration testing solutions

#### THE CHALLENGE

- Needed to improve and scale its application security testing process across the enterprise
- Hundreds of apps proliferated without a single owner to define security standards and processes

#### THE SOLUTION

- Developed a framework for intake, assessment, and recommendations for each application
- Conducted penetration testing of web, API, mobile, infrastructure, cloud, ATMs, network devices and containers

#### THE IMPACT

- Identified ~500 vulnerabilities across all applications for this client with 250 net new findings
- Executed over 90+ penetration tests in the year, including flagship financial applications

### Global Software Company – Unmasking Insider Threat During a Cyber Incident

#### THE CHALLENGE

- Company received an email from an anonymous source stating they had two weeks to pay a ransom of one million euros in bitcoin threatening to release client data if his demand wasn't met.
- The data included employee information, banking information and source code for some of the firm's intellectual property.

#### THE SOLUTION

- Deployed EDR and forensic tools to detect early on that an external cybercriminal infiltration from a former employee was the source of the threat.
- Having isolated the information, we conducted a dark web investigation confirming no sensitive data had been leaked

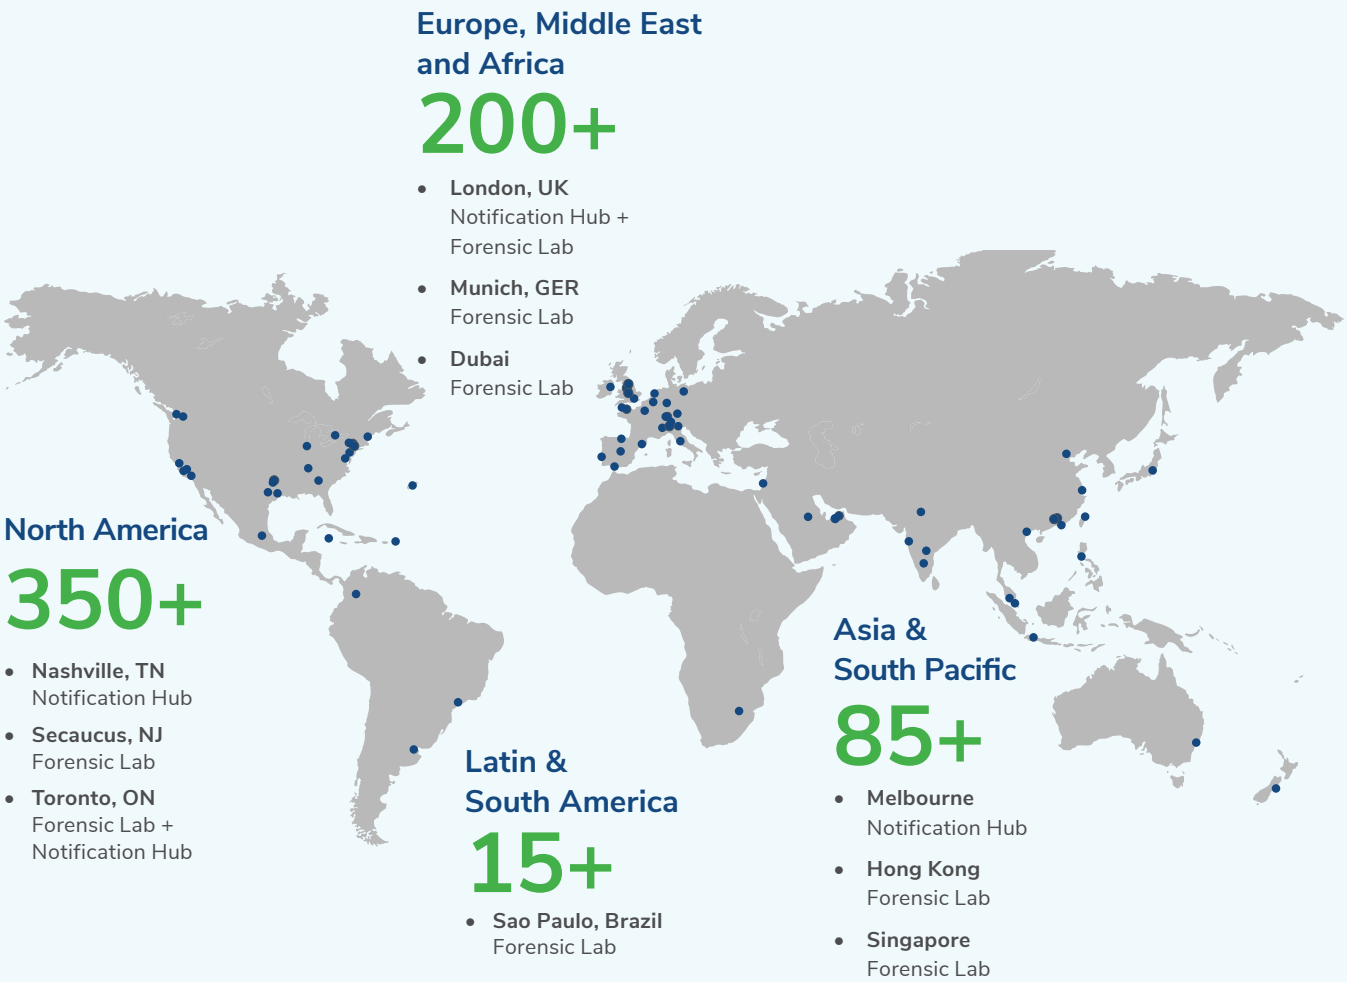

#### THE IMPACT

- Provided findings to the client's attorneys, who initiated a criminal complaint with the local jurisdiction police.
- The evidence was so overwhelming that when the police presented it to a former employee, he immediately admitted his guilt
