

CORPORATE SIMPLIFICATION

Access value, mitigate risk and facilitate growth and transformation through the simplification of your business.

We work alongside our clients to simplify their legal structures, maximise value for shareholders and exit non-core businesses and operations

The make up of your group structure can have a detrimental impact on overall business performance. Too many entities can result in avoidable costs, processes and compliance burdens, duplication of activities, and expose your business and its directors to risk. Ultimately, you can end up spending excessive time or money to just maintain the status quo.

Simplifying your corporate structure will help free these resources, reduce corporate and director risk, promote strong governance and provide a solid platform for growth and transformation.

Our collaborative approach will help implement a programme of positive change tailored to your business that adds value quickly and focuses on the elimination of entities

Our global reach and an integrated team with restructuring, tax and accounting advisory knowledge means we have extensive experience with groups of all sizes, across all business sectors.

How We Can Help

With the right attention, simplifying your legal entity structure can be less complex than anticipated. We work with you to help you see the 'wood for the trees', devise a plan for simplification and prevent errors through careful diligence.

Simplifying your group structure (including appropriate programme support) – preparing for and implementing the elimination of entities that currently or as a result of simplification will no longer serve an economic purpose drawing upon Kroll's global reach and, as necessary, acting as project manager in multi-jurisdictional scenarios.

Asset and Investment Return - once a company or a group of companies have served their purpose we ensure asset realisations are maximised and returned to shareholders tax efficiently.

Closure management - we help plan and implement the operational wind-down and closure of non-core businesses.

Options analysis – we will advise you on your options for eliminating both active and dormant companies and can act as liquidators where circumstances dictate.

Benefits

We can help you deliver meaningful change including the following key benefits:

Cost savings – in terms of both time (ie management time spent on non core/ non trading businesses) and money (ie entity compliance costs).

Reduced compliance burden – less corporate governance and compliance duties.

Increased transparency – fewer subsidiaries, a clear rationale for those that remain and a structure easily explained to stakeholders enhancing their perception.

Risk mitigation – reduced operational and reputational (both for the group and its directors) exposure to risk.

Operational efficiencies –simplified intra group matrix, removal of dividend blocks, capital efficiencies and ease of doing business. In summary, an agile entity structure aligned to your operating model.

What Sets Kroll Apart

Independence

We are the world's premier provider of services and digital products related to governance, risk and transparency. We are 5,000 professionals across 30 countries around the world. We do not undertake audit work. Consequently, we are conflict free and quick to mobilise

Managing Director led

Across all engagements, irrespective of size, bringing deep relevant experience and situational expertise

Cost effective pricing

We have a clear pricing structure. Clients can see what a project is going to cost from the outset. We are happy to participate in initial meetings and discussions on a no obligation basis.

Solution focused

We access the right expertise from across our organisation to deliver the solution that is right for you
